

## CORAPLAST DESSICANT MOR 1201

### Description:

**Coraplast MOR 1201** is a strong dessicant masterbatch and is used in applications where moisture must be avoided. It can be used in applications like in film fluff that was stored outside and other regind material, in black or filler containing compounds.

### How to use MOR 1201:

- **MOR 1201** is the easiest way to solve al your moisture problems.
- **MOR 1201** will absorb and keep the moisture strongly bound up to about 300°C.
- **1 % MOR 1201 can absorb 1000 ppm moisture.**
- Some physical properties:
  - Carrier = PE
  - Specific gravity = 1,05 grams/cm<sup>3</sup>
  - Bulk density = 650 grams/liter
  - Moisture content = < 0,15 %

° Detailed information on FOOD APPROVAL is available upon request.

### Packaging and Storage:

**MOR 1201** is packed in 25 kg woven bags. It can be stored up to maximum 12 months at 30°C. Higher temperatures might reduce this storage time considerably.

This information is correct to the best of our knowledge, but we would recommend that users make their own assesment to confirm that the material meets their requirment.
